# iWorkplace OneDrive Manager Framework

OneDrive Manager is an iWorkplace Framework that reduces information risks and clutter by helping users switch from using OneDrive to structured Teams and Workspaces.

OneDrive Manager:
Global Overview, Local Action

- iWorkplace OneDrive Manager supports **OneDrive use at scale** within your organisation.

- Discover information silos you never knew you had, take action to **minimise the risk** of information accidents, and support your users on the journey to best practice OneDrive use.

1. Identify and compare files created in SharePoint vs OneDrive

2. Take action to move files to SharePoint

3. Manage OneDrive Change with a guided approach to support users on the journey to best practice

OneDrive Manager

Discover information silos and understand how users are using OneDrive by comparing files created in OneDrive and SharePoint for each user.

OneDrive Active Monitoring

We understand how quickly OneDrive overuse can become an issue. We equip you with the tools and know-how to **actively monitor OneDrive use** and proactively manage risk.

Making work better

Alongside our change playbook and OneDrive Manager toolset, our consultants are trained to help you **deliver lasting results into BAU**.

let's make work better
