New Zealand Partner Awards 2020 — WINNER — Empowering Employees

iWorkplace
Smart Guest Management

Collaboration with confidence

Automate and control the process of adding external guest access in Microsoft 365, to get you collaborating quickly, easily and safely.

What is it?

☺ **Empower** users to collaborate and connect with external guests

🔍 **Visibility & Control** over guest access in your organisation

🕐 **Save time** with our automated process. Simply approve or reject guest access and the rest is done for you

What are the benefits...

Easy Collaboration
Users can quickly and easily request external guests to be given access to your organisation.

Governance & Control
External guests must be approved before having access to your organisation.
Request approvers can easily and promptly review requests from their email.

Automated
Approved guests are automatically added to your Azure Active Directory and the selected Microsoft Teams and SharePoint sites.

Visibility
Clearly track and manage guests' access to your organisation by seeing who granted access, when and where they have access.

let's make work better

iWorkplace

Have the confidence to collaborate with external guests safely and easily

How iWorkplace Smart Guest Management connects your organisation to others

1. Collaboration

Pete (User) is working on a project and needs to collaborate with external contractor Michael (Guest)

2. Approval request
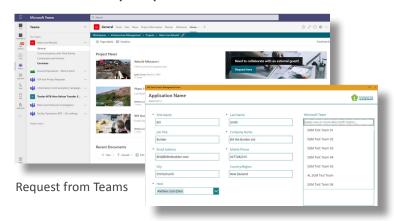

Pete requests approval from Sarah (Approver)

3. Access

Michael and Pete can connect and collaborate

4. Visibility

Veronica (Administrator) can see when, where and who granted access to Michael

Collaboration request process

Request from Teams

Enter guest details

Automate and manage guest access

Site access and guest status visibility

Automation to Azure Active Directory
